

a

ablating the partner surfaces it

filled ● = 95% CI excludes 0

cross-interface, ablated (n = 383)

same-side, ablated (n = 174)

same-side, un-ablated (n = 174)

right of 0 = the sign the cycle predicts

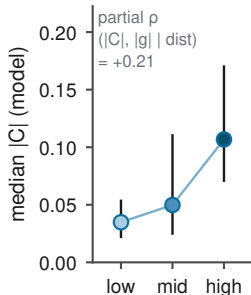

-partial Spearman(C, g | distance)

b

magnitude tracks |g|

557 pairs / 61 cx

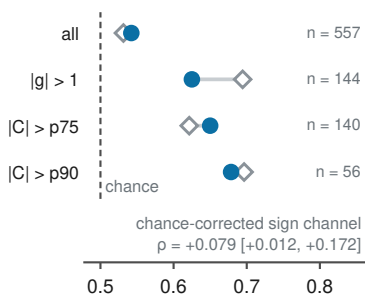

tertile of measured |g|

c

sign barely survives

● model ◇ majority-class

chance-corrected sign channel
